PHARMACOR PRODUCTION was founded in 1998

TODAY THE COMPANY

is a full cycle pharmaceutical production of medications (GMP-0119-000583/20) and food supplements (ГОСТ 52249-2009 / GMP), cosmeceuticals, dietary nutrition and health aids in accordance with GMP standards.

Producing medications of both original and generics the company solves one of the main goals – to provide people with available and high-quality medicines.

Food supplements produced by PHARMACOR PRODUCTION are effective in prevention and complex therapy of different diseases, many of them have no analogues in the composition in the Russian pharmaceutical market.

PHARMACOR PRODUCTION is a reliable contract manufacturer for foreign and Russian pharmaceutical companies. Our company was one of the first in Russia which cooperated with European partners offering our production facilities with a focus on the long term.

2023

First place in the competition for the award from the Government of St. Petersburg, receiving the honorary badge "For the quality of goods (products), works and services" in the category "Best industrial enterprise with 101 to 250 employees."

2021

Competition laureate of Saint-Petersburg government awards "Made in Saint-Petersburg"

Competition laureate of Saint-Petersburg government awards "For good quality of products and services"

2022

Winner of "Green Cross" award in category "Company of the year" in nomination "Private label manufacturer"

2019

Competition laureate of "Green Cross" award in category "Company of the year" in nomination "Domestic manufacturer of dietary supplements"

2021

Competition laureate "Green cross" award in category "Brand of the year" in nomination "The fastest launch of 2021" drug line VairuFlu

2021

Competition laureate "Green cross" award in category "Brand of the year" in nomination "Immune booster 2021" vitaminized drink BerryVitC

QUALITY WARRANTY

Multilevel control

Pharmaceutical quality system based on ISO, GMP, HACCP standards allows continuous monitoring

Own laboratory

Production units and quality control laboratory are equipped with modern high-tech equipment

Annual pharmaceutical audit performed by European pharmaceutical companies

Regular training and confirmation of employees qualification in accordance with regulatory requirements

A team of competent professionals with over 24 years experience

CONTRACT MANUFACTURING, OWN TRADEMARKS

The Company has been cooperating with leading European pharmaceutical companies in contract manufacturing since its foundation, such as «ORION CORPORATION» (Finland), «ITALFARMACO» (Italy), «SOTEX» (Russia) and etc. Products «GLIATILIN», «TAMOXIFEN», «METIPRED», «SUSTAGRAD», «ANVIMAX» — are perfectly proved in Russian pharmaceutical market. The company actively cooperates with pharmacy networks on the own trademarks format.

WE OFFER:

- ✓ The manufacturing of medications and food supplements. Full technological cycle
- ✓ Services for individual stages of production processes
- ✓ Formulation and production technology development
- ✓ Development of analytical methods
- ✓ Services for the registration procedure of a new product
- ✓ Own trademarks production based on the basis of the registered formulations or development of a new formulation
- ✓ Production of food supplements in small batches

R&D NOVELTIES

VIRUNOZIN®

tablets 500 mg
powder for oral solution with apple
500 mg and 1000 mg

INN: Inosine Pranobex

Pharmaceutical group: Immunostimulant

Indication for use: Influenza and acute respiratory viral infections. Infections caused by herpes simplex virus types 1, 2, 3 and 4: genital and labial herpes, herpetic keratitis, shingles, chicken pox, infectious mononucleosis caused by the Epstein-Barr virus. Cytomegalovirus infection. Severe measles. Papillomavirus infection: papillomas of the larynx and vocal cords (fibrous type), genital papillomavirus infections in men and women, warts. Subacute sclerosing panencephalitis. Molluscum contagiosum.

IN REGISTRATION

GLEAKSON-PhP

tablets 500 mg
powder for oral solution with orange or with honey and lemon
500 mg and 1000 mg

INN: Citicoline

Pharmaceutical group: Nootropic agent

Indication for use: Acute period of the ischemic stroke (in complex therapy). Recovery period of the ischemic stroke and the intracranial bleeding. Traumatic brain injury in acute (in complex therapy) and recovery periods. Cognitive and behavioral disorders in degenerative and vascular diseases of the brain.

IN REGISTRATION

MEDICATIONS

IPIDACRINE-PhP

tablets 20 mg

INN: Ipidacrine

Pharmaceutical group: Cholinesterase inhibitor (parasympathomimetic agent, indirect acting). Treatment of myasthenia gravis. Treatment of Alzheimer's disease and of other types of dementia. Psychoanaleptics.

Indication for use: Treatment of diseases of the peripheral nervous system: mono- and polyneuropathy, polyradiculopathy, myasthenia gravis and myasthenic syndrome. Treatment of diseases of the central nervous system: bulbar paralysis and paresis. Use in the recovery period for organic lesions of the central nervous system, accompanied by motor and/or cognitive impairment. Treatment and prevention of the intestinal atony.

IN REGISTRATION

DABIGATRAN-PhP

capsules 110 mg and 150 mg

INN: Dabigatran Etexilate

Pharmaceutical group: Thrombin inhibitors

Indication for use: Prophylaxis of deep vein thrombosis and pulmonary embolism in adult patients following hip and knee replacement surgery. Reduction of risk of stroke, systemic embolism and cardiovascular mortality in non-valvular atrial fibrillation in adult patients and one or more risk factors. Treatment and reduction in the risk of recurrence of deep vein thrombosis and pulmonary embolism and reduction in the risk of deaths caused by these diseases in adult patients.

IN REGISTRATION

ENDOLAKCOFF

powder for oral solution 64 g

INN: Macrogol

Pharmaceutical group: Osmotic laxative agent

Indication for use: Bowel preparation before endoscopic colonoscopy or x-ray examination of the colon or surgical interventions requiring a clean bowel. Indicated for use only in adults.

IN REGISTRATION

MEKRIDON®

tablets 150 mg

INN: Meglumine Acridonacetate

Pharmaceutical group: immunostimulant

Indication for use: For adults and kids from 4 years old in complex therapy and acute respiratory diseases and herpetic infection. For kids from 4 years old for the prevention of influenza and acute respiratory diseases.

IN REGISTRATION

R&D NOVELTIES

IN REGISTRATION

GESPERIDIN + DIOSMIN-PhP

film-coated tablets 500 and 1000 mg

INN: micronized purified flavonoid fraction

Pharmaceutical group: Capillary stabilizing agent. Angioprotectors. Bioflavonoids.

Indication for use: treatment of symptoms of venous insufficiency (heaviness in the legs, pain, swelling and cramps). Treatment of symptoms associated with acute hemorrhoids.

IN REGISTRATION

REGIDRATANT COMPLEX

powder for oral solution

INN: Dextrose + Potassium Chloride + Sodium Chloride + Sodium Citrate

Pharmaceutical group: Oral rehydration solutions

Indication for use: Restore or prevent fluid and electrolyte loss due to mild to moderate diarrhea/vomiting. The drug replaces the reserves of water and salts.

IN REGISTRATION

CLOPIDOGRAL-PhP

film-coated tablets 75 mg

INN: Clopidogrel

Pharmaceutical group: Platelet aggregation inhibitors

Indication for use:

Acute Coronary Syndrome (ACS):

- Clopidogrel is indicated to reduce the incidence of myocardial infarction (MI) and stroke in patients with non-ST-elevation ACS (unstable angina [UA] / non-ST-elevation myocardial infarction [NSTEMI]), including patients who are eligible for medical treatment, and those who require coronary revascularization. Clopidogrel should be given in combination with aspirin.

- Clopidogrel is indicated to reduce the incidence of myocardial infarction and stroke in patients with acute ST-segment elevation myocardial infarction (STEMI) who require medical treatment. Clopidogrel should be given in combination with aspirin.

Recent MI, recent stroke, or established peripheral arterial disease: in patients with established peripheral arterial disease or with a recent myocardial infarction (MI) or recent stroke, clopidogrel is indicated to reduce the incidence of myocardial infarction and stroke.

IN REGISTRATION

RIVAROXABAN-PhP

film-coated tablets 10, 15 and 20 mg

INN: Rivaroxaban

Pharmaceutical group: Factor Xa inhibitors

Indication for use: prevention of postoperative deep vein thrombosis and associated pulmonary embolism in patients undergoing hip- or knee-replacement surgery. Secondary prevention of Deep Vein Thrombosis and/or Pulmonary Embolism: used beyond the initial 6 months of treatment to reduce the risk of recurrent venous thromboembolic events.

NICOTINE REPLACEMENT THERAPY

Nicotine Addiction Treatment

ТАБЕНОВА®

help in quitting smoking

Cytisinum

TABENOVA®

film-coated tablets 1,5 mg

INN: Cytisinum

Pharmaceutical group: Nicotine Addiction Treatment

Indication for use: for the treatment of tobacco addiction (to facilitate smoking cessation). Physical and psychological addiction to nicotine is considered a specific type of disease that results in an inability to refrain from smoking even though its negative effects are understood.

MEDICATIONS

SYNTHETIC ANTIDIABETIC (HYPOGLYCEMIC) AGENTS

DIABEPHARM MV tablets 30 mg
Modified-release tablets N° 60

INN: Gliclazide

Pharmaceutical group: Hypoglycemic agent for oral administration, sulfonylurea group II generation

Indication for use: Diabetes mellitus type 2 in combination with diet therapy and moderate exercise with the inefficiency of the last.

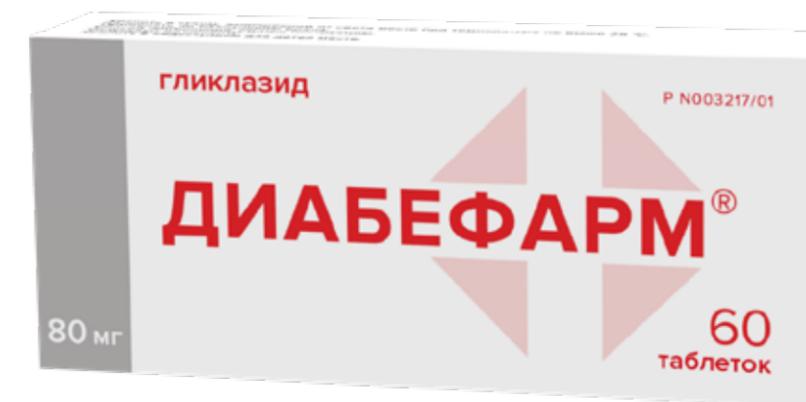

DIABEPHARM MV tablets 60 mg
Long-acting tablets N° 30, 60, 90

INN: Gliclazide

Pharmaceutical group: Hypoglycemic agent for oral administration, on the base of sulfonylurea group II generation

Indication for use: Diabetes mellitus type 2 in combination with diet therapy and moderate exercise with the inefficiency of the latter last.

DIABEPHARM tablets 80 mg N° 60

INN: Gliclazide

Pharmaceutical group: Hypoglycemic agent for oral administration, on the base of sulfonylurea group II generation

Indication for use: Diabetes mellitus type 2 in combination with diet therapy and moderate exercise with the inefficiency of the latter last.

Attention! Packages of medications are available in a new design.
Medications in pharmacies can be present both in old packaging and in updated ones.

MEDICATIONS

AMLODIPINE

tablets 5 mg № 20, 30, 60, 90
tablets 10 mg № 10, 12, 24, 30, 60, 90 (в регистрации)

INN: Amlodipine

Pharmaceutical group: Calcium slow channel-blocking agent

Indication for use: Arterial hypertension. Monotherapy or combination with other antihypertensive agents. Stable pectoris angina and vasospastic angina (Prinzmetal angina). Monotherapy or in combination with other antianginal agents.

CAPTOPRIL

tablets 50 mg № 20, 40, 60
tablets 25 mg № 20, 40, 60

INN: Captopril

Pharmaceutical group: Angiotensin-converting enzyme (ACE) inhibitor

Indication for use: Arterial hypertension, including renovascular hypertension; chronic heart failure (as part of combination therapy); disorders of the left ventricle functions after myocardial infarction in a clinically stable condition; diabetic nephropathy on the during of type 1 diabetes mellitus.

ENALAPRIL

tablets 10 mg, 20 mg № 20

INN: Enalapril

Pharmaceutical group: Angiotensin-converting enzyme (ACE) inhibitor

Indication for use: Arterial hypertension, chronic heart failure. As part of combination therapy.

ANTIDIARRHOEAL AGENTS

DIOSMECTITE

powder for oral suspension preparation 3.0 g N° 10, 30

INN: Smectite dioctaedic

Pharmaceutical group: Antidiarrhoeal agent

Indication for use: Diarrhoea (allergic, medicinal genesis; diet violation and food quality changing), gastritis, gastric ulcer and duodenal ulcer, colitis, infectious genesis diarrhoea in the complex therapy. Symptomatic treatment of heartburn, flatulence and abdominal discomfort in diseases of the gastrointestinal tract.

NEW FLAVORS:

- ORANGE
- STRAWBERRY

Attention! Packages of medications are available in a new design. Medications in pharmacies can be present both in old packaging and in updated ones.

ANTIALLERGIC AGENTS

LORATADINE

tablets 10 mg N° 10, 20, 30

INN: Loratadine

Pharmaceutical group: Antiallergic agent - H1-histamine receptor blocker

Indication for use: Seasonal and year-round allergic rhinitis, conjunctivitis, pollinosis, urticaria (including chronic idiopathic), angioedema, allergic itchy dermatoses, pseudoallergic reactions, allergic reactions to insect bites, itch of different etiology.

VairuFlu

powder for oral suspension preparation 5.0 g N° 4, 10

INN: Paracetamol + Phenylephrine + Pheniramine + Ascorbic Acid

Форма выпуска: Powder for oral solution preparation [raspberry, lemon, honey-lemon]

Pharmaceutical group: Remedy for symptoms of acute respiratory disease and «cold» elimination (analgesic non-narcotic drug + alpha-adrenomimetic + H1-histamine receptor blocker + vitamin)

Indication for use: Infectious and inflammatory diseases (ARVD, flu), accompanied with high fever, chills, aching in the body, headache and muscle pain, runny nose, nasal congestion, sneezing.

EXPANDING THE LINE!

"VairuFlu" won the "Green Cross" International Pharmaceutical Award in 2021 in "the Fastest Launch of the Year 2021" nomination.

AGENTS FOR PREVENTION OF RESPIRATORY INFECTIONS, ACUTE RESPIRATORY DISEASES IMPROVEMENT OF IMMUNITY

IMMUNOTIME. MANGO capsules 0.25 g

Complex based on mango extract, containing the active substance mangiferin, which has high antibacterial and antiviral activity and immunostimulating properties, including in relation to DNA-containing viruses of the herpes group.

MANGIFERIN
3 plant extracts
Vitamin C, Zinc

 [product details – иммунотайм.рус](https://immunotaim.ru)

* The only dietary supplement in Russia for strengthening immunity containing mango extract (according to DSM Group JSC) as of the III quarter of 2020

IMMUNOTIME. ECHINACEA WITH VITAMIN C capsules 0.32 g

Echinacea extract helps to strengthen the immune system, has a strong antibacterial and antiviral activity, increases working capacity and slows down the aging process.

Echinacea, Zinc
Vitamin C

 [product details – иммунотайм.рус](https://immunotaim.ru)

TONZILOSEPT® capsules 0.17 g

Complex based on natural plant extracts helps against inflammation of the throat, swelling of the vocal cords, makes breathing easier when coughing, accelerates the separation of sputum. It has antipyretic, soothing and antispasmodic effect.

6 plant extracts
Vitamin C
For children from 14 years old

SINUCOMB® capsules 0.37 g

Complex based on natural plant extracts relieves swelling of mucous membranes, it has antiseptic and anti-inflammatory effect. Has an anti-allergic effect, helps to strengthen the walls of blood vessels.

5 plant extracts
Rutinum

SOLISEPT
lozenges 1200 mg

Lozenges on the basis of sea salt and iodine moisturize, clean, protect and strengthen the mucous membranes of the throat and mouth, help relieve sore throat, have antiseptic and anti-inflammatory effect.

Dry gargle
Sea salt
Iodine

VITAMORS IMMUNO
packs 6.5 g

Natural complex with general tonic action on the basis of vitamins and microelements, natural crushed cranberries and cowberries, traditionally used for colds and deficiency of vitamins with anti-inflammatory effect, increasing immunity.

Natural composition
Convenient form of application
Does not contain sucrose

Vitamors immuno is a winner of "Green Cross" award in 2018 in nomination "for the prevention and treatment of seasonal diseases"

CHOKEBERRY
packs 6.5 g

Chokeberry Dietary Supplement normalizes blood pressure, prevents atherosclerosis and normalizes cholesterol levels, as well as improves gastrointestinal tract functioning and supports the thyroid gland.

Natural composition
Convenient form of application
Vitamin c, Zinc

БЕРРИ 
ВИТС

Nature's care for health your family

We took traditional recipes, natural ingredients and with using modern technology created a drink that stores force of nature, easy to prepare and will help to keep the whole family healthy

- ✓ Natural, balanced composition
- ✓ Pleasant berry flavor
- ✓ Produced in a convenient form - sticks
- ✓ Bright and memorable packaging design, motivating to buy
- ✓ Manufactured in accordance with GMP standards

**NATURAL
COMPOSITION**

**EASY
TO PREPARE**

**EASY
TO USE**

BERRYVITS RASPBERRY AND D₃

sticks 5 g
N° 10, 20

A fortified drink for replenishing the lack of microelements and vitamins in children and adults, based on a powder made from natural raspberry juice. Raspberries have anti-inflammatory and bactericidal effects, are a natural antioxidant and immunostimulant. Vitamin D₃ - participates in the assimilation of calcium, which is necessary for strengthening bone and dental tissue, is useful for the nervous system, improves mood and performance. Prevents the development of diseases of the heart and blood vessels, endocrine glands, osteoporosis, multiple sclerosis

BERRYVITS ECHINACEA AND ELDERBERRY

sticks 5 g
N° 10, 20

An effective fortified drink used as part of complex therapy for colds, acute respiratory viral infections and flu. Intensive intake of a hot drink during the first days of illness helps to reduce the initial symptoms of flu and colds, increases the body's resistance to viral, bacterial and fungal infections.

BERRYVITS RASPBERRY AND HONEY

sticks 5 g
N° 10, 20

Fortified drink to support the body's defenses during the cold and flu season. Herbal components in the composition replenish the deficiency of vitamins and facilitate the course of the disease.

BERRYVITS NORD

sticks 5 g
N° 10, 20

Fortified drink containing natural juice of unique berries - cranberries, lingonberries, cloudberry. These northern berries contain a large amount of vitamin C, macro and micro elements that stimulate the immune system, have antipyretic, anti-inflammatory, bactericidal and diaphoretic effects.

BERRYVITS CARDIO

sticks 5 g
N° 20

Hawthorn or "heart berry" useful in complex therapy for functional disorders of the heart, arterial hypertension, atrial fibrillation, etc. Promotes the tone of the heart muscle, improves blood circulation in the vessels of the heart and brain, relieves discomfort in the heart. Formulated with cherry berry powder, vitamin C and rutin.

Complex "BerryVitS" in 2021 became the laureate of the International Pharmaceutical Prize "Green Cross" in the category "Brand of the Year" in the nomination "Means for strengthening the immune system 2021".

 [product details – vitme.ru](http://vitme.ru)

VITANOV – vitamins to the maximum!

The human body does not produce or store vitamin C, which is why it is so important to include vitamin supplements in the daily diet.

Confirmed action of vitamin C and the benefits of using it for colds:

- ✓ Reduction of the acute period of the disease
- ✓ minimization of complications
- ✓ smoothing of symptoms
- ✓ quick return to normal life

- Vitamin C improves the health of teeth, gums, bone tissue, has a positive effect on the condition of blood vessels and helps to strengthen them.
- Vitamin C promotes the healing of wounds, fractures, prevents the development of vitamin deficiency, scurvy, promotes the absorption of iron, improves skin regeneration.
- Vitamin C slows down aging and is considered one of the most important antioxidants for the body.

**NEW
PRODUCT**

ZINC + D₃ + C + QUERCETIN
tablets 0,27 g

The complex is aimed at restoring the body's defenses and reducing the risk of developing colds during the flu season. The combination of active ingredients that enhance each other's action become a reliable support for your immunity. Quercetin - a natural bioregulator and antioxidant that reduces swelling of the stitis and lungs promotes accelerated recovery.

VITANOV C
sticks 5 g

Vitanov C in a convenient form of administration - powder in sticks. Has a symptomatic effect on flu and colds. Easy to prepare: dissolve in 150-200 ml of warm or hot water with a temperature of 35-40 °C, mix thoroughly and the fortified drink is ready.

VITANOV C MAXIMUM
capsules 0.90 g

900 mg of ascorbic acid is the recommended daily intake for the treatment and prevention of vitamin C deficiency. Regular intake stimulates the production of interferon, increases the activity of leukocytes and helps to reduce tissue intoxication.

**1 capsule
600 ME**

VITANOV D₃
capsules 0.11 g

Vitamin D3 controls calcium-phosphorus metabolism and is essential for bone growth and bone repair. It also affects other physiological processes in the body, including the processes of stimulating cell growth, neuromuscular conduction and immunity.

EAST COLORS® - line of monoproducts

Traditional Eastern medicine is based on body maintenance and diseases prevention caused by imbalance of body function.

EAST COLORS® contains five monoproducts, the action of each is aimed at correcting a certain deviation.

EAST COLORS® - a longevity source for maintaining balance and harmony of the body.

RED RICE capsules 0.56 g

Contains a plant-based statin to lower cholesterol. Natural statin has a higher bioavailability compared to its synthetic analogue and has no side effects. Indispensable for the prevention of cardiovascular diseases and for high cholesterol.

BLACK CARROT capsules 0.31 g

Black carrot (scorzonera) contains total digestible minerals, inulin and vitamins (B1, B2, B6, C, PP, E), as well as microelements (phosphorus, copper, iron, calcium, manganese, potassium, zinc, etc.). Strengthens the immune system, preserves vision, acts prophylactically, prevents age-related macular degeneration (retinal damage and central vision impairment).

EAST COLORS® - a new line of monoproducts based on the secrets of Eastern medicine

CURCUMIN capsules 0.3 g

Curcumin - a potent natural antioxidant that provides the body protection against free radical aggression that can cause a variety of different diseases. Curcumin slows down the aging process, skin aging in particular. Curcumin extract, enhanced with essential phospholipids, acts as a "rejuvenation" factor for cell membranes and, whole body.

YELLOW CUCUMBER capsules 0.5 g

Active substances normalize blood sugar levels, which is especially important when treating diabetes and for its prevention. Effective for complications of chronic hyperglycemia, especially for retinopathy.

WHITE TEA capsules 0.3 g

Has a unique chemical composition, and all active substances are preserved thanks to minimal processing of raw materials. Its beneficial effect for the cardiovascular system is due to active components in composition catechins, which make the blood vessel walls more elastic, and the degree of their permeability gets increased several times. Another active component theophylline can affect the normalization of metabolic processes, helps to control cholesterol level and has a vasodilatory effect

SORBECTIN packs 4 g

Complex based on dietary fiber of plant origin facilitates the development of normal intestinal microflora. Pectins and antioxidants improve the condition at food and poisoning, alcohol intoxication.

**Pectin, Arabinogalactan
Peppermint extract
Green tea extract**

SORBIPOL powder for oral suspension preparation 25 g, 50 g

The active components have a high sorption capacity against microorganisms, tissue breakdown products, and other toxins, thereby restoring the body and reducing the intensity of intoxication symptoms.

It has bactericidal properties and anti-inflammatory effect.

**Silica (Aerosil)
Succinic acid
Effective cleansing**

product details –
сорбипол.рус

IMMUNOTIME. PREBIO packs 4 g

Restores the disturbed microbiota balance (beneficial gut microorganisms). Prebiotic that improves the functional state of gastrointestinal tract, used for prevention of constipation and dysbacteriosis. Immunotime. Effective in combination with weight loss programs.

**Source of dietary fiber
Source of polyfructosan
Wheat bran, Pectin**

product details –
иммунотайм.рус

SORBECTIN FOR CHILDREN packs 4 g

Natural complex based on Apple pectin with extracts of fennel and chamomile facilitates the development of normal intestinal microflora, elimination of food toxins and their removal from child's body.

**Apple pectin
Fennel and chamomile extract
For kids from 3 years old**

LACTITOL packs 6 g

Natural complex based on apple pectin normalizes digestion, has an antimicrobial effect and contributes to dysbacteriosis and constipation prevention.

**Lactitol
Pectin
Natural cleansing**

IMMUNOTIME. PREBIO KIDS packs 3.5 g

Prebiotic that improves children's gastrointestinal tract function, promotes the growth of beneficial microflora and soft, regular bowel movement, provides a natural process of body's cleansing. It is an effective source of dietary fiber, as well as an excellent immune system stimulant.

**Source of dietary fiber and polyfructosan
Wheat bran, Pectin
For kids from 3 year old**

NOOTROPIC AGENTS

GINKGOBIL capsules 0.25 g

Plant extracts and micronutrients of the complex have a positive effect on brain and coronary blood circulation, prevent the aging process of the brain, improve memory and attention in old age.

Ginkgo biloba extract
Gotu kola extract and L-carnitine
Ease of use only 1 capsule per day

GlycinUm sticks 1 g

Components of the complex facilitate the improvement of concentration and memory, resistance to mental overload and neuro-emotional stress, improve mood and normalize a sleep.

Source of glycine
Contains L-carnitine and vitamin B₁
No need to drink water

The only glycine-based complex in the Russian pharmaceutical market produced as powder in sublingual form. It is characterized by high efficiency and instant absorption of active substances.

SEDATIVES

NATUR-PASSIT + L-tryptophan. Calmness tablets

NATURPASSIT® capsules 0.4 g

A natural complex based on plant extracts protects the body from stress, reduces the risk of headaches, migraines and normalizes night sleep.

7 natural extracts
Ingredients are not addictive
Contains vitamins B₁, B₂, B₆, B₁₂

 [product details – naturpassit.ru](https://naturpassit.ru)

RELAXEN SKULLCAP + HOP capsules 0.25 g

Natural plant components of the complex have a mild calming effect, help to cope quickly with irritability, increased nervous excitability and insomnia.

Mild soothing effect
Does not reduce concentration
Ingredients are not addictive

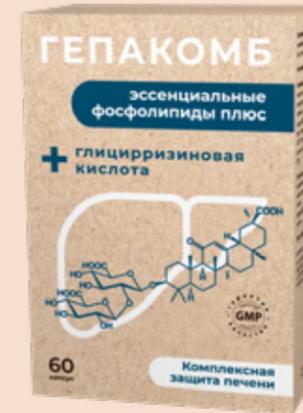

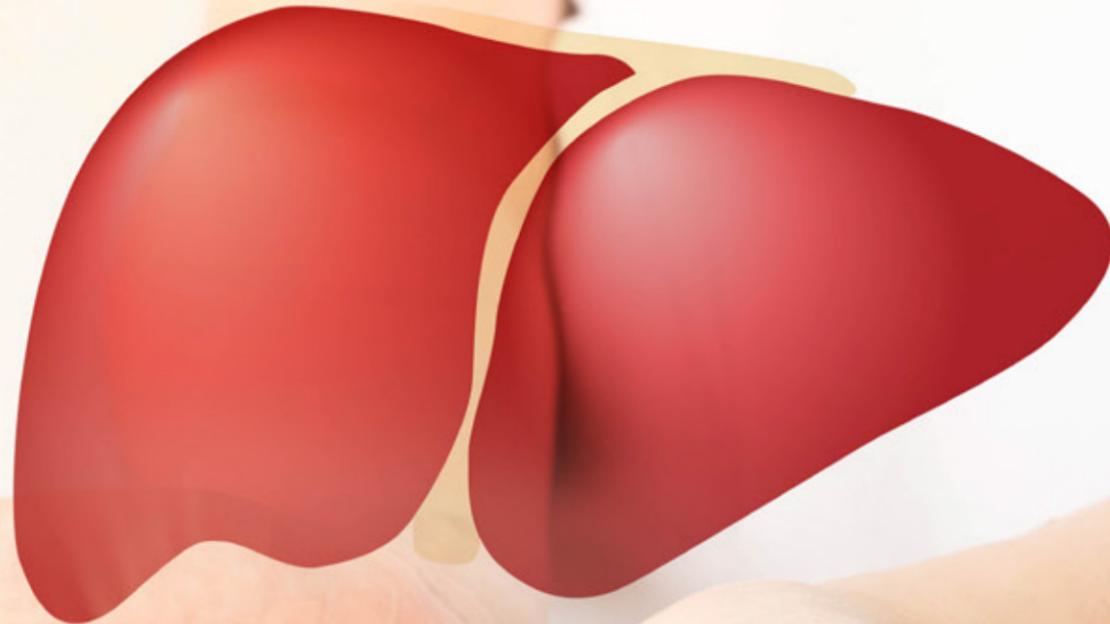

HEPACOMB is a line of natural hepatoprotectors

HEPACOMB

Protecting
your liver

A line of natural hepatoprotectors

The line includes drugs aimed at the basic needs of liver health - protection, renewal, and restoration of cells, elimination of toxins, protection against obesity and toxic damage

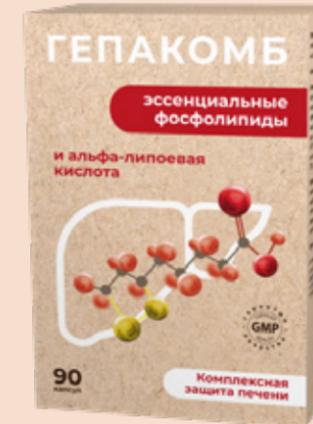

HEPACOMB. ESSENTIAL PHOSPHOLIPIDS PLUS
with glycyrrhizic acid
capsules 0.43 g

Promotes comprehensive protection of the liver, relieves inflammation, normalizes protein vogo, lipid and fat metabolism. Essential lecithin phospholipids are the main elements in the structure of the cell membrane and liver cells, and form a double lipid layer in cell membranes.

Glycyrrhizic acid, due to its high surface-active effect, improves the emulsification of phospholipids in the intestine.

At least 1500 mh essential phospholipids in a daily dose
Does not contain glycyrrhizic acid

HEPACOMB. ESSENTIAL PHOSPHOLIPIDS
and alpha lipoic acid
capsules 0.43 g

Alpha Lipoic Acid - an antioxidant that reduces severity oxidative stress, trapping free radicals that damage nerve cells, is able to restore glutathione stores, prevent mitochondrial damage and cell death.

HEPACOMB. ESSENTIAL PHOSPHOLIPIDS
capsules 0.47 g

The complex enhances liver cell renewal. Phospholipids and vitamin E normalize metabolism, increase the resistance of liver cells to harmful effects (pharmacological agents, alcohol, toxins), improve the functional status of digestive tract.

1200 mg essential phospholipids in a daily dose
Contain vitamin E

HEPACOMB is a line of natural hepatoprotectors.

The line includes drugs aimed at the basic needs of liver health - protection, renewal, and restoration of cells, elimination of toxins, protection against obesity and toxic damage.

HEPACOMB. MILK THISTLE
capsules 0.22 g

Milk Thistle extract improves metabolic processes in the liver, increasing its resistance to adverse conditions, affects on the activity of the liver enzymatic systems, promotes the formation of hepatocytes.

High content of silymarin in one capsule – 60 mg
Ease of use only 1 capsule per day

HEPACOMB. OVELUX
capsules 0.36 g

Plant components of the complex facilitate the liver purification, liver cell regeneration, stimulate bile formation and bile secretion, protect the liver from poisoning toxins.

HEPACOMB. DETOX
packs 6 g

Protects liver from obesity and eliminates toxins, including ethanol metabolites.

Facilitates restoration and renewal of liver cells, has a choleric effect. Improves digestion and reinforces immune system.

HEPACOMB. ARTICHOKE
capsules 0.5 g

Artichoke extract improves liver function and restores its cells, provides antioxidant protection, enhances liver anti-toxic function, stimulates bile flow.

480 mg artichoke in one capsule

IMPROVEMENT OF UROGENITAL SYSTEM AGENTS

product details –
vialissil.ru 

VIALISSIL
capsules 0.45 g

Natural complex for men based on plant extracts that improve erectile function, increase libido and maintain the reproductive system.

Eurycoma, epimedium and sabal palm extracts
Contains yohimbine
Easy of use only one capsule per day

PALM SABAL
capsules 0.46 g

Sabal palm extract contains a unique complex of fatty acids, including lauric and palmitic, as well as phytosterols and triterpene saponins, which reduce prostatic hyperplasia and strengthen the reproductive function of the body.

Sabal palm extract 320 mg
Easy of use only one capsule per day

CYCLOPHEM
capsules 0.23 g

Phytoestrogens are an alternative route to hormone replacement therapy. The balanced natural composition, fortified with vitamins and microelements, will provide a mild effect on the body, restoring the cycle and helping to reduce the premenstrual syndrome. Herbal ingredients - sacred vitex and white-flowered peony extract help to normalize and reduce menstrual irregularities, have anti-inflammatory and analgesic properties.

Plant extracts and folic acid
Well tolerated with few side effects

CONTROL AND CORRECTION WEIGHT AGENTS

DUOSLIM EXPERT
capsules 0.45 g + capsules 0.3 g

Components of complex are a natural regulator of metabolism, reduce appetite, stimulate motility of the gastrointestinal tract – the complex is indispensable for people who control body weight and prefer plant and vegetable components.

No laxative effect
Can be taken for a long time is not addiction

 Dietary supplements for weight control and management are also presented in the Sibella line 

FOOD SUPPLEMENTS and COSMECEUTICALS

CARDIOVASCULAR SYSTEM SUPPORT AGENTS

BIOTONZ. CARDIOTONIC
capsules 0.25 g

Plant components of the complex - hawthorn fruit extract and dihydroquercetin, tone the heart muscle, improve blood circulation, strengthen the walls of blood vessels and capillaries, normalize blood cholesterol levels, improve overall health.

BIOTONZ. COENZYME Q10 EXTRA
capsules 0.43 g

Provides additional energy to maintain the normal functioning of the heart and strengthen blood vessels; it is a powerful antioxidant and is able to neutralize the activity of free radicals - the main factor of aging.

CARDIOVIT
capsules 0.43 g

Complex is effective in reducing the risk of cardiovascular diseases and improving the functional status of cardiovascular system. Natural ingredients are enriched with vitamins C and B₆.

BIOTONZ. CHITOSAN
capsules 0.22 g

Natural product Biotonz. Chitosan is compatible with human body tissues, by being converted in the gastrointestinal tract into a gel with high absorbing properties, chitosan molecules take up cholesterol in the digestive tract and remove it from the body, contributing to the prevention of cardiovascular diseases.

KLESCHKARTA

A health-related plastic product – the «tick-extraction device of the KLESCHKARTA trademark» – is intended for safe extraction of ticks from human and animal skin.

It is important to remove the tick properly and as quickly as possible!

Tick-borne encephalitis is transmitted through tick's saliva, and borrelia is transmitted during the blood regurgitation from the tick's esophagus. The earlier the tick is removed, the higher possibility of preventing infection and getting the lowest dose of pathogens.

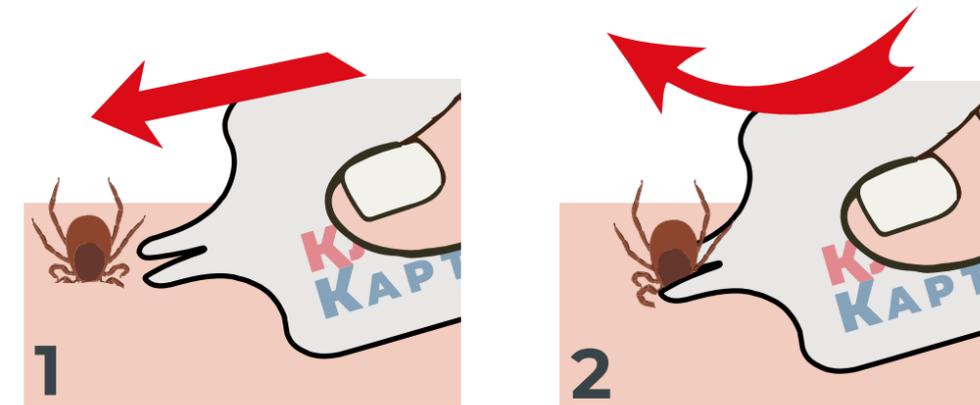

KLESCHKARTA has passed the voluntary certification procedure reg. No. POCC RU.AM05.H06406

Tested at the Department of Epidemiology, Parasitology and Disinfection, North-Western Medical University named after I.I. Mechnikov

HOW TO REMOVE A TICK USING A KLESCHKARTA?

1. Insert the groove of the KLESCHKARTA under the embedded tick.
2. With a slight forward movement of the card, remove the tick.

- ✓ After removal, place the tick in a plastic flask.
- ✓ The place of removal should be treated with an antiseptic cloth.
- ✓ Wash your hands and KLESCHKARTA with warm water and soap.
- ✓ Deliver the removed tick within 2 days to the laboratory to make an analysis for tolerable tick-borne infections.
